

SPACE SAVINGS: THE CHEP PALLECON-315 VS. STAINLESS STEEL

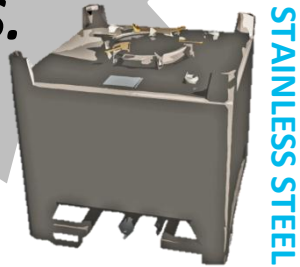

CHEP

The CHEP Pallecon-315 collapses to offer greater efficiencies in transportation and storage
Transporting the same capacity in Stainless Steel totes could require almost 3 times the freight for reverse logistics, increasing costs and environmentally harmful emissions

CHEP PALLECON-315

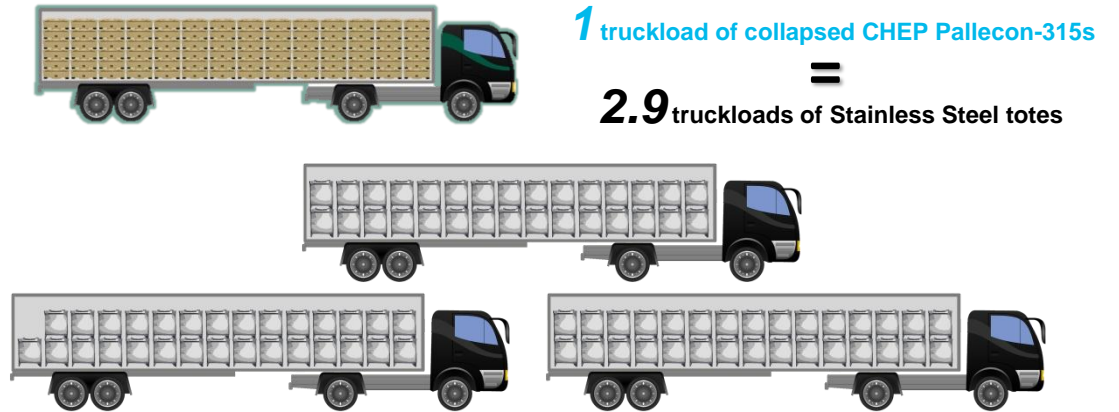

VS.

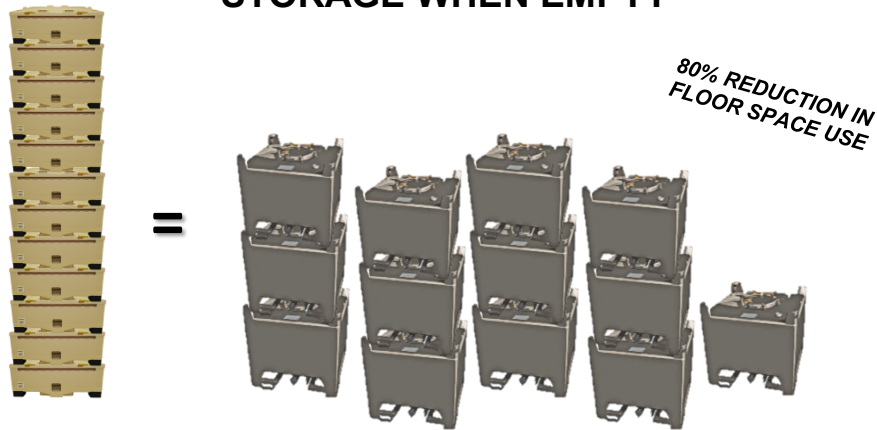

STAINLESS STEEL

TRANSPORTATION EFFICIENCIES

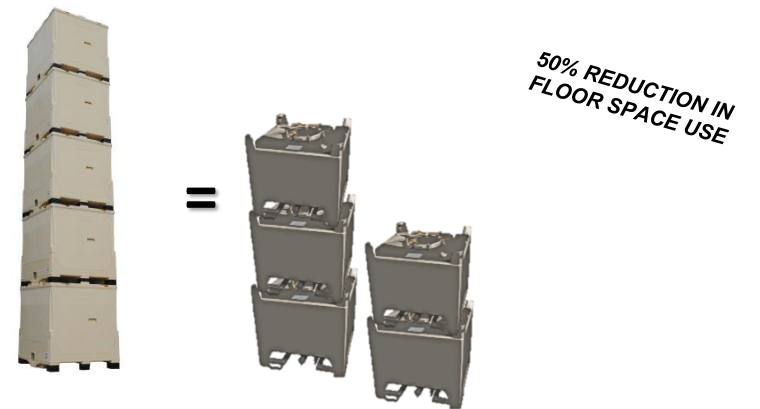

STORAGE WHEN EMPTY

Unlike steel totes, the CHEP Pallecon-315 collapses and stacks up to 12 high when empty, saving a significant amount of valuable warehouse floor space.

STORAGE WHEN FULL

CHEP Pallecon-315s can stack 5 high when full without the need for racking systems, significantly reducing floor space needed in storage.
